(— + — + — + — +) **TOTAL 5 times — +**

# INSTALLATION MANUAL

## MULTICAN 1C EVO

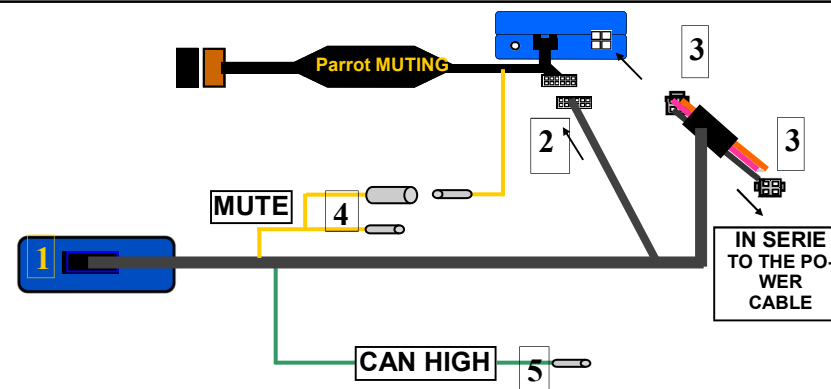

CANBUS Adapter for steering wheel commands  
& PARROT EVOLUTION Handsfree Kit rev 3.0

### DESCRIPTION

**MULTICAN 1C EVO** is a **UNIVERSAL** adapter for steering wheel commands with GM LAN protocol for SAAB 93 - 95 and OPEL INSIGNIA - NEW ASTRA (2009>) vehicles.

The module allows you to control the PARROT EVOLUTION Handsfree Kit with the steering wheel commands.

The selection of the protocol comes through **SELF-RECOGNITION**, which means that on the termination of the connections for the insertion of the module to the connector, the unit will carry out, in about a second, the synchronization and the selection of the CANBUS protocol of the car on which the module is installed.

### CONNECTIONS

1. Connect the power cable to the 14-way connector of the Multican.
2. Join the connector of the interface's to the kit's control keypad to the MICROFIT input.
3. Connect the power cable connector to the power plug of the Parrot control unit and join the Parrot power harness.
4. Connect the YELLOW MUTE wire of Multican to the Parrot's YELLOW MUTE wire and to the car stereo MUTE input (if available).
5. Refer to the schematic next page.

### WARRANTY CONDITIONS

**THIS PRODUCT IS GUARANTEED FOR 2 YEARS FOR ANY MANUFACTURING DEFECT.  
THE PURCHASING FISCAL DOCUMENT SERVES AS THE GUARANTEE VALIDITY**

## CANBUS CONNECTIONS SAAB 93

CONNECT THE **CAN H** WIRE OF THE MULTICAN TO ONE OF THE TWO CANBUS **GREEN** WIRES FOUND IN THE WIRES BUNDLE UNDER THE SKIN CAP OF THE STEERING WHEEL

## CANBUS CONNECTIONS OPEL (SEEN FROM CABLE OUTPUT OF CONNECTORS)

## SELF-LEARNING AND FUNCTIONS

The selection of the protocol comes through **SELF-RECOGNITION**; after the connections are terminated by inserting the module to the connector, the unit will carry out in about one second, the synchronization indicated with **quick RED flashes** of the module's LED.  
As soon as the synchronization is carried out, the vehicle's protocol is selected; this operation is confirmed by the lighting up of the **GREEN FIXED LIGHT** of the module's LED.  
The unit is ready to work.

## TROUBLESHOOTING

- The unit doesn't work and the LED is switched off.
- Verify the power supply connections.
- The correctly powered unit doesn't work and the LED is switched off.
- Verify the CANBUS connections.
- The unit is correctly connected and the RED LED flashes quickly.
- The unit can't be synchronized with the CANBUS; contact Paser.
- The unit is correctly connected and the RED LED flashes in an irregular way.
- Verify the CANBUS connections.
- The unit is correctly connected and the RED LED is on.
- The unit has carried out the synchronization with the CANBUS but can't recognize the vehicle; contact Paser.

## Answer to an incoming CALL:

Press

## Close the CALL:

Press
