INSTALLATION MANUAL

MULTICOMM 3100

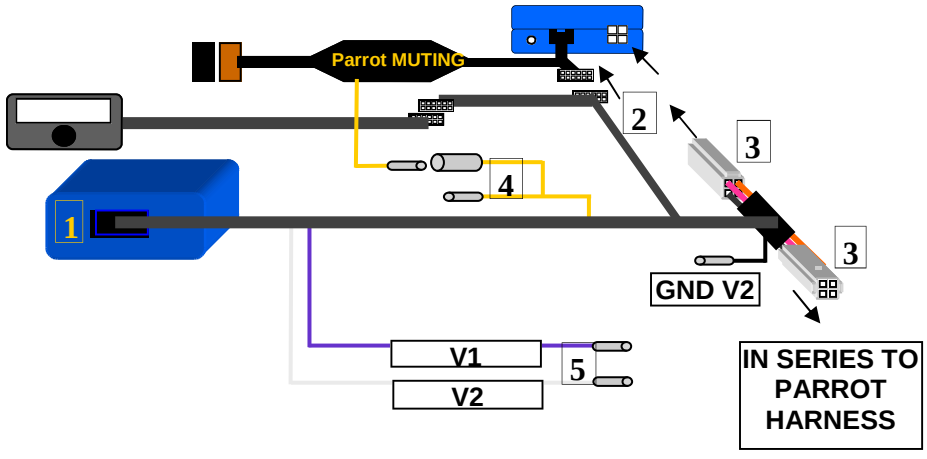
UNIVERSAL Adapter
for RESISTIVE steering wheel commands
& PARROT CK3100 Handsfree Kit **rev. 2**

DESCRIPTION

MULTICOMM is a **UNIVERSAL** adapter for steering wheel comands with a **resistive voltage** protocol. The module allows you to control the PARROT 3100 Handsfree Kit with the steering wheel commands in all its functions.
The selection of the protocol comes through a **SELF-LEARNING** procedure, which means that on the termination of the connections with a few and simple operations you can pair the H/F kit to the steering wheel commands.

CONNECTIONS

- Connect the power cable of Multicomm to the 14-way connector of the Multicomm.
- Join the connector of the kit's control keypad or the TERMINATION plug (6) to the connector of the interface's power cable
- Connect the Multicomm ISO power cable to the ISO power cable of the Parrot control unit .
- Connect the YELLOW MUTE wire of Multicomm to the Parrot's YELLOW MUTE wire and to the car stereo MUTE input if available.
- Refer to the chapter entitled CONNECTIONS to connect the V1 and V2 wires.



WARRANTY

THIS PRODUCT IS GUARANTEED FOR TWO YEARS AGAINST ANY MANUFACTURING DEFECT.
PURCHASE INVOICE IS REQUIRED AS A VALIDITY OF THE GUARANTEE
