

CONVERSO DISPLAY

CONVERSO DISPLAY

SHOW YOUR PARROT HANDSFREE KIT INFORMATION
DIRECTLY ON YOUR CAR DISPLAY!

Compatible with:

Parrot®

Converso Display is a Multiprotocol interface able to connect OEM car steering wheel commands to any Parrot handsfree kit, MKi series. Therefore all Parrot handsfree kit system functions will be handy!

Thanks to Converso Display you can easily manage your music and your phone whenever you want, visualizing on your original car display all Parrot handsfree kit information like: menu items, the caller name / tel.number, etc.

Independently of steering wheel commands configuration, Converso Display enables all Parrot handsfree kit system functions by following a specific keys sequence. Converso Display can be upgraded!

VIEW DIRECTLY ON YOUR DISPLAY:

- name and/or number of the caller
- handsfree kit menu
- etc.
