# KIT CHARGE CAR

## **IMMEDIATE RECHARGE**

KIT CHARGE CAR is a device that has the ability to dispense to the battery of a vehicle such energy in such a short time, as to be virtually immediate in its action. Once connected to the battery, in fact, as soon as you turn the ignition, the vehicle will restart!

## **DEVICES CHARGE**

KIT CHARGE CAR is a universal charging device that can not only recharge the battery of the vehicle but which, thanks to cables supplied with the kit and dedicated module outputs, can be a charger for any device in your possession: smartphone, tablet, PSP, cameras etc.

## **ELECTRIC TORCH**

KIT CHARGE CAR is also a very useful device as torch. Choosing among the various lighting options available, you will have a safe and faithful assistant in all situations of need for which the light is necessary.

## **RECHARGEABLE EVEN IN CAR**

KIT CHARGE CAR provides a feeding of considerable intensity energy in a very short time and therefore need to be recharged: this is possible or by connecting to a 220V domestic socket or, more conveniently, by connecting it to the cigarette lighter socket of the vehicle.

## The system

**KIT CHARGE CAR** is the new kit charging car batteries developed by Paser.

The system provides a reliable, simple to use and inexpensive to remedy the vehicle low battery problem.

The small size of **KIT CHARGE CAR** allows a high standard integration in a small space.

### **WARNING!**

The module can only be used for motor vehicles:  
Gasoline and Diesel up to 5000 CC to 3000 CC

# KIT CHARGE CAR

## Operating as a charger car

**KIT CAR CHARGE** device is effective with all vehicles, whose engine is compatible with the requirements:

- < 5000 CC Gasoline
- < 3000 CC Diesel

You will only have to connect the clamps provided in the kit to the vehicle battery and to the charging module, using the dedicated input and then plug the battery cable in the **KIT CHARGE CAR** unit.

Now turn the ignition and that is it all: the vehicle will start immediately

## Operating as a battery Charger for other devices

**KIT CHARGE CAR** module is not limited to being an instant battery power for vehicles, but is a recharger module in the broadest sense.

Thanks to a USB port for connecting to various mobile devices (5V / 2V) such as:

- **Smartphone**
- **Tablet**
- **Camera**
- **MP3 Players**
- **PSP**
- **Etc.**

It will be possible and simple to recharge the battery of similar devices!

**The time for a complete recharge is about 3 hours.**

# KIT CHARGE CAR

## The operation as torch

**KIT CHARGE CAR** is also a very useful device as torch. Choosing among the various lighting options available, you will have a safe and faithful assistant in all situations of need night for which the light is crucial.

## The kit

The product is sold by Paser in a comfortable and convenient kit to always carry with you on:

**1 set of battery clamps**

**1 module battery charging KIT CHARGE CAR**

**1 connection cable for electrical outlets to 220V**

**1 connection cable for the lighter socket of the vehicle**

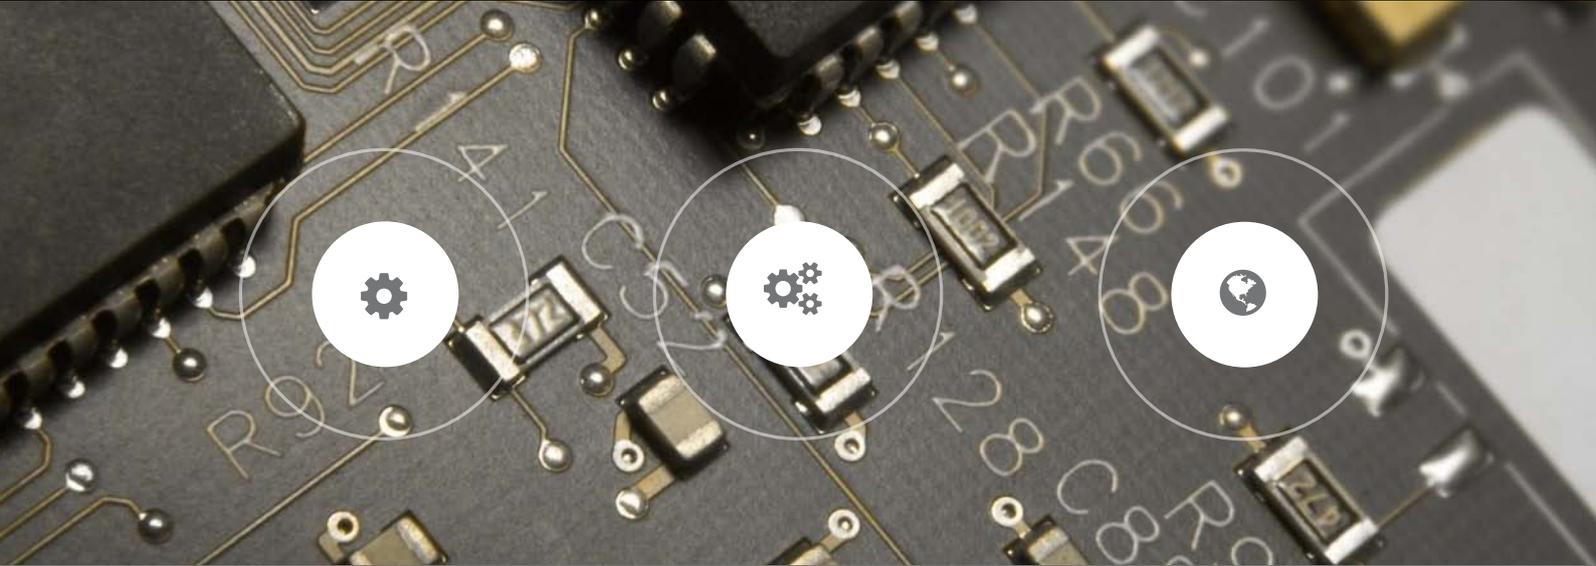

**1 USB / iPod adapter cable (LIGHTNING and 30 pin) / microUSB**

**1 Installation and Use Manual**

**1 carrying case**

## Technical Specifications

**Dimensions:** 180 x 87 x 29 mm

**Weight:** 445 g

Lighter socket connections (12 V)

USB input

220V input

**Power on current:** 200 A

**Maximum current:** 400 A

**Power supply:** 12 VDC

**Full charge time:** 3 hours

## Paser products

**Paser** corporate culture is characterized by a strong focus on innovation and flexibility, with a particular and constant focus on the Customer.

The Paser products are universal and compatible with each type of vehicle.

Paser entire production cycle is developed in Italy.  
Paser products are known for ease of use, excellent quality and exquisite design.

**Paser is certified UNI EN ISO 9001: 2008**, ensuring total quality in all business processes.

From design to production, to after-sales services such as highly **qualified technical assistance**.

## Paser products

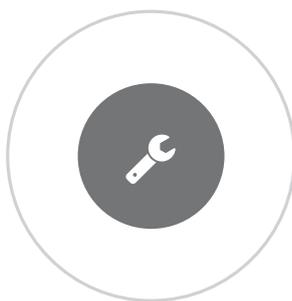

### Project

Specific, versatile and multifunctional solutions for the protection and safety of your vehicle

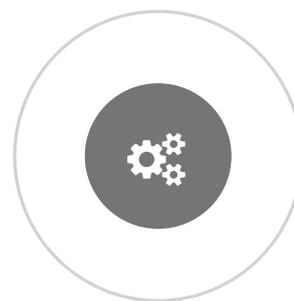

### Design

Realization of devices with cutting-edge design and suitable for all types of automotive configuration.

### Installation

Easy installation, ensuring system efficiency, ease of use and total safety for the end user

### Development

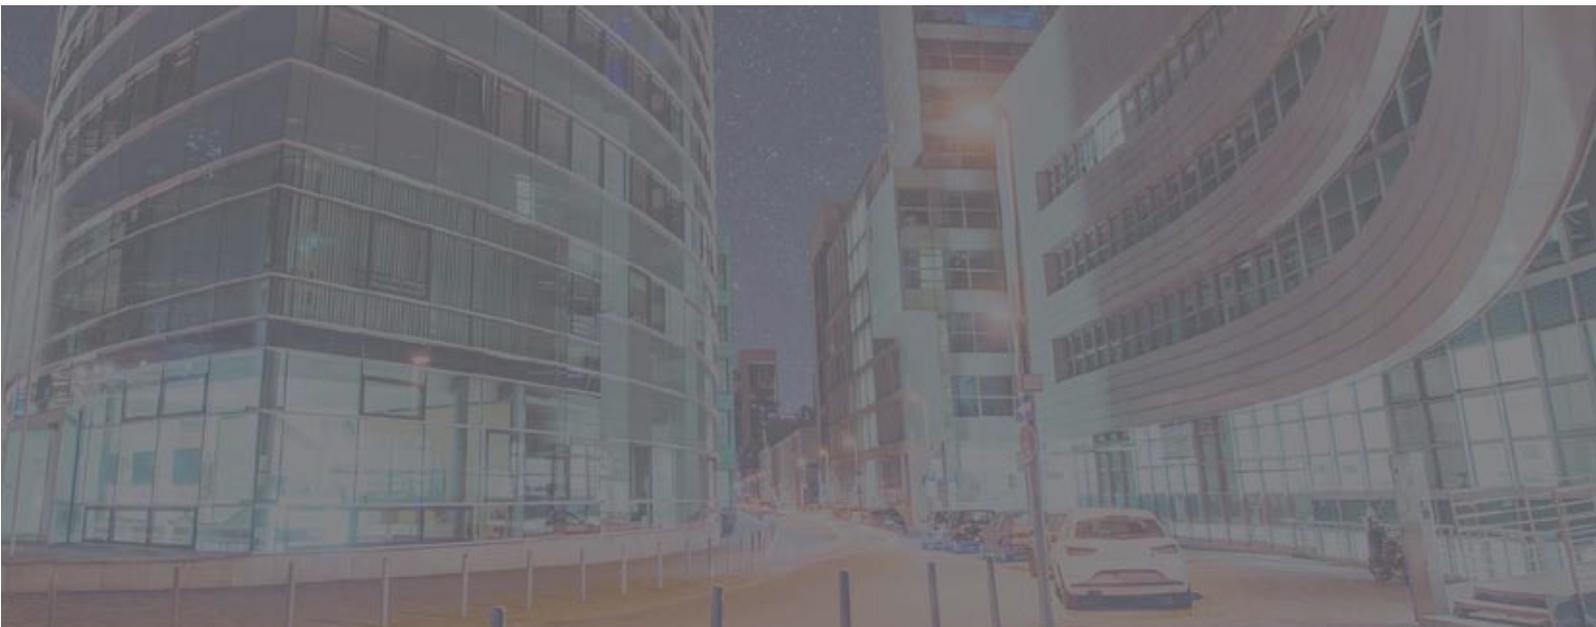

Nearly all connections are Plug & Play, simple and intuitive, in order to reduce costs and installation time

## Why choose a Paser product?

**Paser** boasts an experience of over 20 years in the electronics applied to the most different sectors.

**Paser products** integrate the functionality and most common characteristics in the world of accessories for civilian vehicles with the specificities of each time detected in varied contexts.

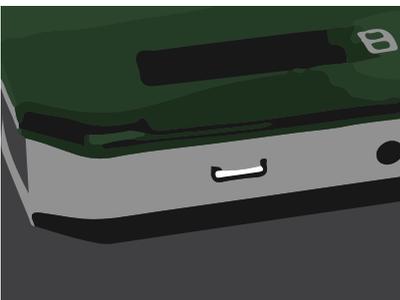

**Paser products** constitute a whole of integration between the various security contexts, protection and traceability and thus allow you to install and use a very **advanced system technology** and covering in their entirety the expressed needs of an accessory of our vehicle, but offering a **simple use** really for everyone!

## Why choose a Paser product?

The Paser products are projected, manufactured and produced by PASER srl, since 20 years a leader in the electronics, applied to the most varied sectors.

PASER srl also offers the service of study and implementation of systems for any use and application!

**Design**

**Comfort**

**Easy to use**
