

# Safety Kit SKT170

THE MULTIFUNCTIONAL KIT FOR YOUR SAFETY ON THE ROAD

## SAFETY KIT SKT170

THE MULTIFUNCTIONAL KIT FOR  
YOUR SAFETY ON THE ROAD

SKT170 KIT is a new product recommended to improve driver safety. Its range of features alerts the user when necessary.

SKT170 can be installed using a Plug & Play harness; no sensors are required in the car.

Features available at the moment are:

- Tires pressure monitoring system
- Speed limit exceeding alert advice
- Worn tires alert advice

System setting can be directly done from the button supplied with the kit.

SKT170 vocal menu is multilingual speeched; 4 languages are available in its memory among: Italian, English, French, Spanish, German and Portuguese.

## Tire pressure monitoring system

SKT170 main function is to control the tires pressure status continuously and to advise the user in case of anomalies (drilling, decrease / increase tire pressure).

This TPMS device does not need special sensors installation on the tires because it is completely managed through the vehicle Canbus line (system patent pending).

A vocal message warns the driver about which tire has to be controlled.

## Speed limit exceeding alert advice

This function is very important in order to respect the strict European laws concerning speed limits!

In detail, the function let you set in advance a speed limit that, if exceeded, switch on the KIT vocal alarm advice.

Thanks to this feature it will be difficult to exceed accidentally any speed limit.

## Worn tires alert advice

SKT170, continuously checks the miles covered by your vehicle, and alerts you by a vocal message, if your tires have to be replaced or reversed.

This feature allows you to keep always in perfect condition car tires in order to increase your passengers safety.

It's possible to set/reset the upper miles limit after which the alert message must switch on.

SKT170 maintains this datum in it's memory even in the case of car battery substitution.

# Technical Characteristics

## Features

- Tires pressure monitoring system
- Speed limit exceeding alert advice
- Worn tires alert advice

## Canbus

- Canbus self-learning car protocol
- Setting through the button

## Speech

- Vocal menu Updater
- Languages supported: Italian, English, French, Spanish, German and Portuguese.
- Volume adjustable

## Audio

- Amplifier 4x5W integrated

## Power

- Feeding Power: +12V
- Consumption (idle): 3 mAh
- Consumption (wake up mode): 60 mAh
- Consumption (working mode): 3 Ah

## Dimensions

- Width/Depth/Height: 68x68x28 mm

## Upgrade

- The system is upgradeable for the implementation of new cars and functions
