# UNICAN PLUS: the strenghts

**UNICAN PLUS** is an interface to control aftermarket radios via steering wheel controls, able to work with **CANBUS and KBUS protocols**.

The unit contains CANBUS Paser protocols and radio protocols in its memory.

The selection of the car protocol occurs automatically, once the unit is connected to the CANBUS network, while the radio selection occurs via the controls on the steering wheel of the car.

**UNICAN PLUS** is self-programming and updatable!

For faster installation of the unit, the appropriate **Plug&Play harnesses** can be purchased separately (on the website [www.paser.it](http://www.paser.it)).

The main feature are the following:

- **Self-recognition of the CANBUS line**
- **Recovery of service outputs that can be used as ignition, reverse gear, speed signal, handbrake, sidelights**
- **Possibility of using the speed signal output to connect radio-navigator or taximeter**
- **Recover of OEM adjustment systems and Audio menus (for compatible vehicles\*)**
- **Recover of the parking sensor sound via dedicated buzzer (for compatible vehicles\*)**
- **OEM amplifier wakeup (for compatible vehicles\*)**

## MAIN FUNCTIONS

\*To know all compatibilities, please consult the list on the website [www.paser.it](http://www.paser.it)

## UNICAN PLUS: car compatibilities

\*To know all compatibilities, please consult the list on the website [www.paser.it](http://www.paser.it)

# UNICAN PLUS: car radio compatibilities

**ALPINE**

**Pioneer**

**SONY**

**JVC KENWOOD**

...and the car radios of alternative brands manufactured in Asia!

## Technical Features

Power supplying:	10-16 VDC
Absorption in sleep mode:	0,001 A
Absorption in use:	0,040 A
Temperature:	-35 / +70
