UNICAN is a steering wheel commands interface able to control aftermarket radios by managing both Canbus and Kbus protocols.

UNICAN has all Paser Canbus protocols in its memory.

To select right protocol, you only have to connect the unit to Canbus car net.

UNICAN is self programming!

The unit is upgradeable!

Here below its features:

- » **Canbus self-recognition**
- » **Canbus integration for steering wheel commands and services**
- » **Available services: positive ignition, reverse gear, speedpulse, handbrake, lights**
- » **Compatible with cars working in Canbus, Kbus protocols**
- » **Compatible with more than 20 car radio brands**
- » **Compatible with more than 30 car brands**
- » **Recovery of OEM setting adjustment, audio menu and parking sensors**
- » **OEM amplifier wake up**

For a faster connection, it is possible to buy separately Plug & Play harnesses.
