## INTRODUCTION

**Videotronic 2.0 is an electronic device able to improve car driving comfort by executing some special functions.**

Videotronic 2.0 enables the aftermarket car radio control through OEM steering wheel commands by managing both Canbus and resistive car protocols, and it can also **\*\*automatically \*visualize** on aftermarket radio display all information provided by car parking sensors .

In addition to this Videotronic 2.0 is able to show, on the aftermarket radio display, air conditioner information.

Videotronic 2.0 has a USB input for later updating.

\*Aftermarket radio must be equipped with a rear camera input.

\*\*Aftermarket radio must be equipped with a switch control for rear camera.

# VIDEOTRONIK 2.0

## MAIN FEATURES

Regulating the automatic air conditioner, all information will be \*visualized on the aftermarket radio display.

### NEW GRAPHIC FOR THE AIR CONDITIONER INFORMATION

\* The radio must have the back-video and the back gear input to automatically visualize the air conditioner.

All information provided by car parking sensors will be \*automatically visualized on aftermarket radio display, while the backgear is inserted.

### NOW VISUALIZE 4 FRONT PARKING SENSORS AND 4 REAR PARKING SENSORS

\* The radio must have the back-video and the back gear input to automatically visualize the parking sensors.
