

UNICOM PLUS RENAULT

**Electronic unit for vehicles
equipped with radio SWC lever
with contact buttons**

MADE IN ITALY

UNICOM PLUS RENAULT: the strenghts

UNICOM PLUS RENAULT is an electronic interface for controlling aftermarket radios via steering wheel controls, capable of operating on Renault (and group) vehicles equipped with a radio steering wheel control lever with contact buttons.

The radio protocols are present in the module memory and can be selected immediately afterwards learning the buttons on the steering wheel.

Thanks to the Paser learning system, installing this module will be a simple and fast operation.

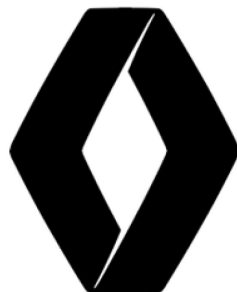

UNICOM PLUS RENAULT is upgradeable!

For a faster installation of the module, the appropriate **Plug&Play harnesses*** can be purchased separately.

***ATTENTION!** Compatibility with P&P wiring is only verified with certain vehicles from 2014 onwards (consult the website www.paser.it)

UNICOM PLUS RENAULT: some car compatibilities

To find all the single compatible vehicles,
please consult the product compatibility list
on the website www.paser.it

UNICOM PLUS RENAULT: car radio compatibilities
