

# UNICOM EVO

Available for all the most known  
Vehicle and Car Radio Brands!

MADE IN ITALY

**UNICOM EVO** is the new UNIVERSAL interface for OEM steering wheel controls that Paser offers to the market as upgrade for the **UNICOM** range.

The unit has been specifically designed for a wide number of vehicles with **Resistive protocol** steering wheel controls and for car radio equipped with wired SWC remote input.

**UNICOM EVO** offers some important special features:

- **Customization of the resistive buttons time output pressure for car radio with resistive learning**
- **Standardization of radio functions for all car radio models**
- **Compatibility now also with LINBUS protocol**
- **Preprogrammed profile (special versions please contact Paser)**
- **Management of Telephone and Voice functions (even with a single button)**

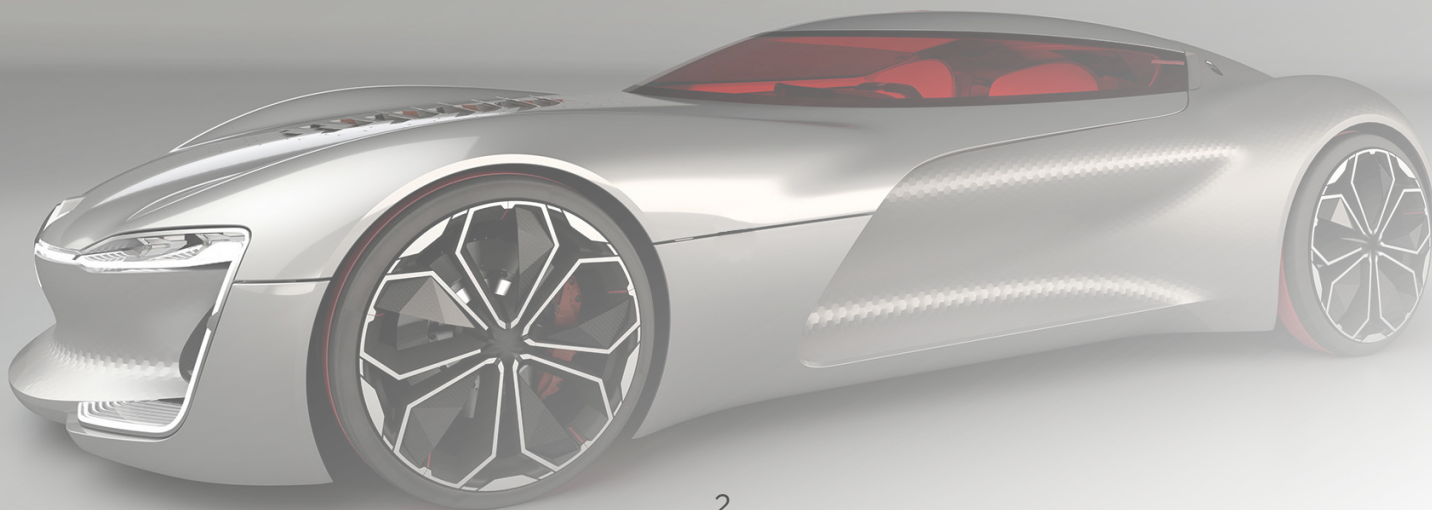

In addition to the dedicated radio brand version such as UNICOM EVO ALPINE, PIONEER, SONY etc.), Paser offers **UNICOM EVO PLUS** that includes all the radio protocols in its memory.

The different radio protocols can be selected immediately after learning the buttons on the steering wheel.

Thanks to the innovative Paser learning system, installing UNICOM EVO PLUS will be a simple and fast operation.

**UNICOM EVO PLUS is upgradeable!**

For a faster installation of the module, the appropriate **Plug & Play harnesses** can be purchased separately.

## UNICOM EVO: some car compatibilities

## UNICOM EVO: car radio compatibilities

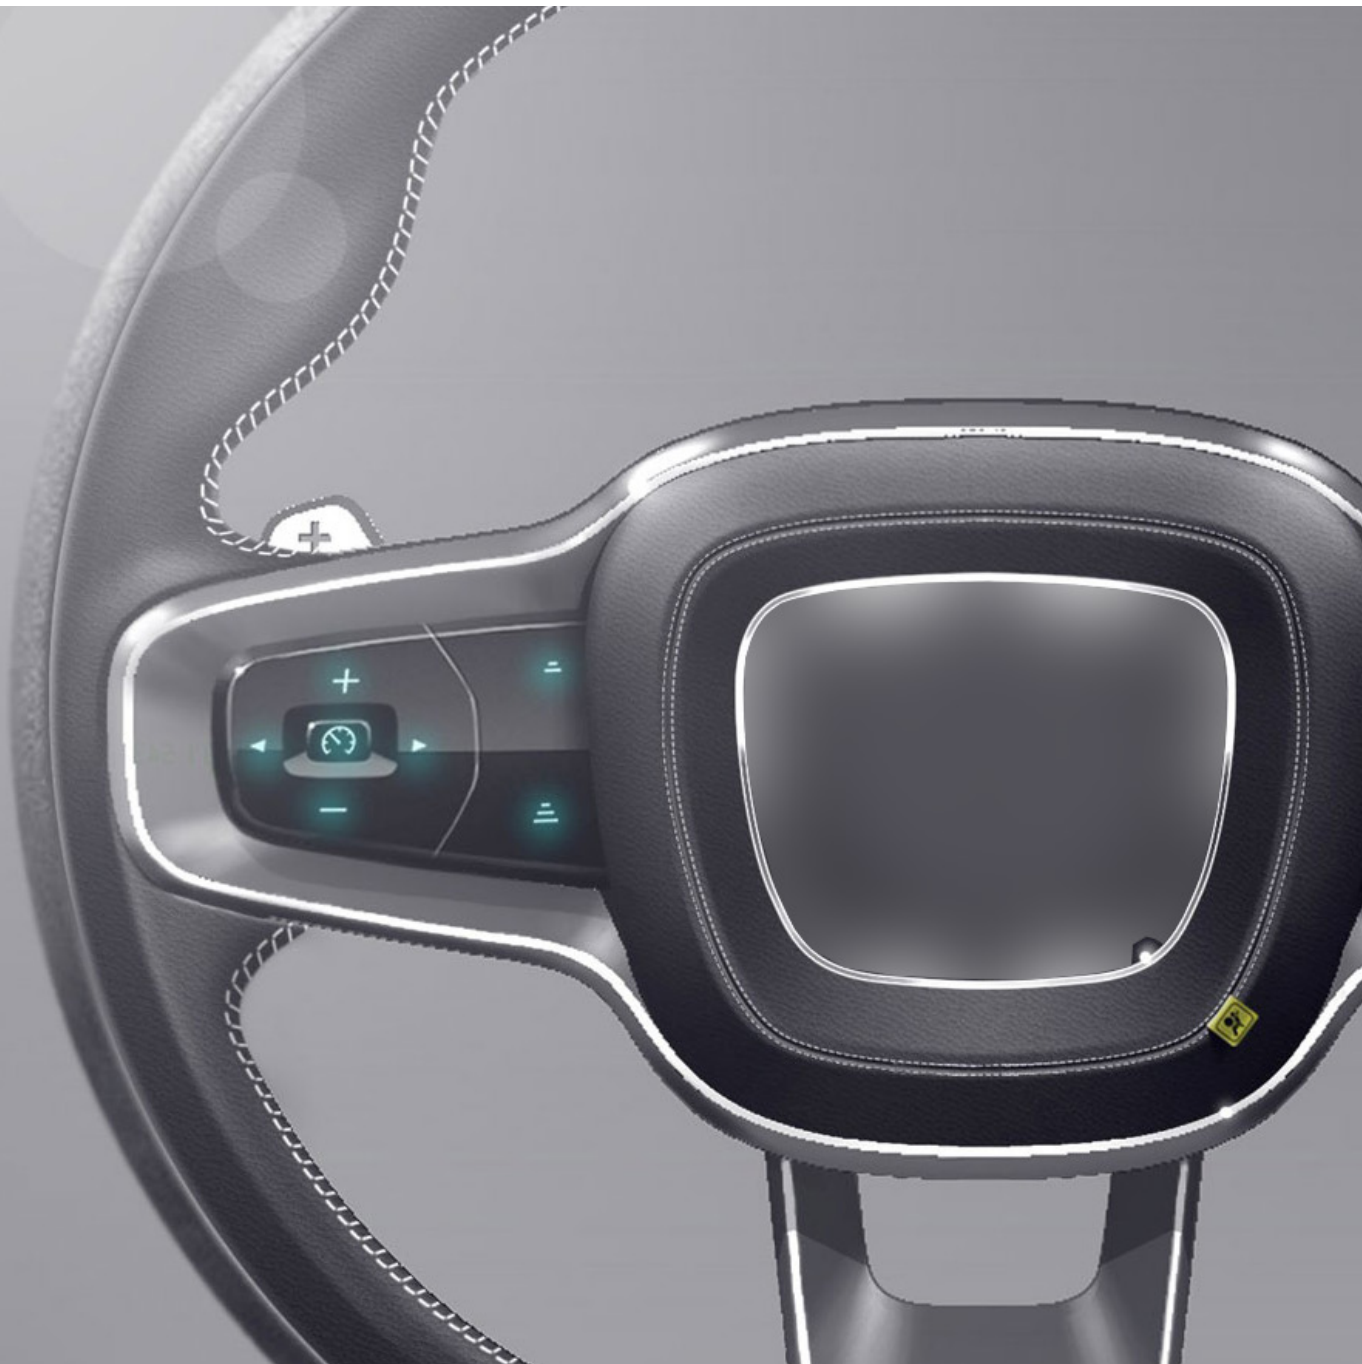

**ALPINE**

**Pioneer**

**SONY**

**JVC KENWOOD**

...and the alternative brands of car radios manufactured in Asia!
