

Maestro 3.0 Blue / MediaDAB 3.0 Blue Upgrading Procedure

For this kind of device are available 2 different upgrading systems:

Application Upgrade (FWP054UNMSXX.fwp)

This upgrade rectifies/improves the working of interface basic functions as for example menu management, track reproduction and DAB functions.

Speech Synthesis Upgrade (MaestroBlue_XXX_XXX_XXX_XXX_XXX.vox)

The device, in the standard configuration, is provided with four languages. However it is possible to substitute them with other languages or with the most updated version.

Application Upgrade

Download updating file: **MaestroBlue_Application_vX.X.zip** from the website **www.paser.it**.

Extract the file: **FWP054UNMSXX.fwp** from the archive.

Copy file **FWP054UNMSXX.fwp** into the **ROOT** of a USB pen which has been formatted with a **FAT32*** file system.

Connect USB pen to the device.

Switch on the device.

Enter the updating menu following the path:

Menu ->> Setup ->> System ->> Upgrade System Version

Follow vocal instructions.

Upgrade Voices

Download updating file: **MaestroBlue_Voice_XXX-XXX-XXX-XXX_vX.X.zip** from the website **www.paser.it**.

Extract the file: **MaestroBlue_XXX_XXX_XXX_XXX_XXX.vox** from the archive.

Copy file **MaestroBlue_XXX_XXX_XXX_XXX_XXX.vox** into the **ROOT** of a USB pen which has been formatted with a **FAT32*** file system.

Connect USB pen to the device.

Switch on the device.

Enter the updating menu following the path:

Menu ->> Setup ->> Voice ->> Upgrade Voice

Follow vocal instructions.

RDS system will indicate the bytes count-down to the upgrade end.

*To execute the upgrade it is necessary a USB pen compatible.
